User Manual

Library Catalogue System Project

Khurram Shehzad	NIM-BSEE-2021-20
------------------------	-------------------------

1. Introduction:

The Library System Project is a software application that allows users to manage a library catalog. It provides features such as adding books, searching for books, deleting books, and sorting books by title or author. This user manual will guide you on how to use the software effectively.

2. System Requirements:

- Operating System: Windows, macOS, or Linux
- Python 3.x installed
- Tkinter library installed (usually included with Python installation)

3. Installation:

- Ensure that Python 3.x is installed on your system.
- Open a command prompt or terminal.
- Install Tkinter library

4. Running the Application:

- Open a command prompt or terminal.
- Navigate to the directory where the "library_system.py" file is located.

- Run the following command to start the application

```
python library_system.p
```

- The Library System application window will appear.

5. Login:

- you will see a login screen.
- Enter your username and password in the respective fields.
- The default username is "Khurram" and the password is "3182".
- Click the "Login" button to proceed.

6. Main Menu:

- After successful login, the main menu screen will be displayed.
- The main menu provides the following options:
 - a. Add Book: Click this button to add a new book to the library catalog.
 - b. All Book List: Click this button to view all books in the catalog.
 - c. Search Book: Click this button to search for books based on keywords.
 - d. Delete Book: Click this button to delete a book from the catalog.
 - e. Sort Book: Click this button to sort books by title or author.

7. Adding a Book:

- To add a book, click the "Add Book" button on the main menu.
- A new window titled "Add Book" will appear.
- Enter the title, author, and subject of the book in the respective fields.
- Click the "Add" button to add the book to the catalog.
- The "Add Book" window will close, and the book will be added to the catalog.

8. Viewing All Books:

- To view all books in the catalog, click the "All Book List" button on the main menu.
- A new window titled "All Books" will appear.
- The window will display a list of all books in the catalog, including their titles, authors, and subjects.

9. Searching for Books:

- To search for books, click the "Search Book" button on the main menu.
- A new window titled "Search Book" will appear.
- Enter a keyword related to the book you want to search for in the "Keyword" field.
- Click the "Search" button to perform the search.
- The window will display a list of books that match the keyword, including their titles, authors, and subjects.

10. Deleting a Book:

- To delete a book from the catalog, click the "Delete Book" button on the main menu.
- A new window titled "Delete Book" will appear.
- Enter the title of the book you want to delete in the provided field.
- Click the "Delete" button to remove the book from the catalog.
- If the book is found and deleted successfully, the "Delete Book" window will close.
- If the book is not found, an error message will be displayed.

11. Sorting Books:

- To sort the books in the catalog, click the "Sort Book" button on the main menu.
- A new window titled "Sort Book" will appear.
- Click either the "Title" button or the "Author" button to sort the books by title or author, respectively.
- The books will be rearranged in alphabetical order based on the selected sorting option.
- The "Sort Book" window will close after sorting the books.

12. Logging Out:

- To log out of the application, simply close the application window.

Congratulations! You have successfully learned how to use the Library System Project. Enjoy managing your library catalog efficiently.
